

# CYMOTIVE

IT & Cloud Infrastructure  
Security Solutions

Secure, scalable, and production-ready cloud environments for modern mobility

PURPOSE-  
BUILT FOR  
AUTOMOTIVE

END-TO-END  
LIFECYCLE-  
DRIVEN

PROVEN IN  
LARGE-SCALE  
SYSTEMS

HANDS-ON  
EXPERIENCED  
DELIVERY

## Secure Your IT & Cloud Ecosystem as You Scale

As software-defined vehicles, connected services, and mobility platforms evolve, IT and cloud infrastructure has become a critical attack surface. Fragmented security practices, late-stage testing, and limited visibility to risk exposure can lead to operational disruption, compliance risk, and delayed product releases.

CYMOTIVE enables OEMs, suppliers, and mobility service providers to proactively secure IT and cloud environments, **embedding security across the entire production lifecycle** - from architecture to live operations.

### **PRODUCTION-PROVEN EXPERTISE & ENGINEERING**

Backed by **10+ years** of securing complex, connected environments across the mobility ecosystem.

**100+**

Connected Services  
& Web Application  
Projects

**15+**

Cloud & IT  
Platform  
Projects

**10+**

Years' Secure SDLC  
Management for Large-  
Scale Platforms

## Complete IT & Cloud Security for the Vehicle Lifecycle

Combining deep automotive cybersecurity expertise with proven IT & Cloud methodologies, we deliver holistic, scalable security for an evolving threat landscape with:

Detect Risk  
Earlier

Reduce  
Exposure

Securely  
Release Faster

Improve  
Resilience

Increase Audit  
Readiness

We help identify your highest-risk exposure points and define a targeted security roadmap.

### THE CYMOTIVE APPROACH

**Design Securely** – risk-led cloud architecture & compliance-alignment

**Test & Validate** – cloud, API & application security assessments

**Build Securely** – DevSecOps, CI/CD controls & automation

**Simulate Real Threats** – red teaming & adversarial testing

**Operate Securely** – continuous monitoring & detection for rapid response

### WE EXPERTLY DRIVE YOUR:

External **attack surface mapping** & **exposure discovery**

Cloud infrastructure & identity platform (IDP) **security assessments**

CI/CD, IaC & platform **security reviews**

Automated **vulnerability detection** & **configuration scanning**

**Security validation** across cloud, IT & third-party ecosystems

CYMOTIVE Technologies provides end-to-end automotive cybersecurity solutions for software defined vehicles, fleets, and smart mobility.
